- #193 by Buckeye: milking 96# @ 2Y. \* #191 by Pontiac: milking 96# @ 2Y.

Jeff & Tim have decided to change their operation over to crop farming, thus the decision to disperse this super herd of cows. The genetics here are second to none, with the foundation stock going back to Lew Wilsons LEVVINA breeding in Mason, MI. Bruce Dansby started the current herd while working for Wilson's over 25 years ago & turned it over to his sons a few years ago. Together the Dansby family has continued to improve the herd by using only the top bulls while maintaining their outstanding animal husbandry and management practices. Please join us for this top-notch dispersal and add replacements of all ages to improve your herd.
