This young bull is sired by our herd bull a son of the Dakota bull. His mother is a beautiful maternal sister of the 1509 bull also in this sale. His grandam is the Firewater daughter that is a foundation female in my herd. This young bull is wide and deep has excellent feet and legs and his size demonstrates the performance bred into these cow families.

### LOT 5 – VG MR TANK 1515 – Reg. M1012269, Born 5/29/25

Sire – DC/CRJ Tank E108P

Dam – VG MISS DAKOTA 1305

<u>CE</u>	<u>BW</u>	<u>WW</u>	<u>YW</u>	<u>MILK</u>	<u>REA</u>	<u>FAT</u>	<u>MARB</u>	<u>TSI</u>
17.5	-3.1	65	128	32	.57	.003	.12	291

This is a unique opportunity in this young bull with true calving ease and top 15% TSI. His dam is what I think is the best of the Dakota cows in my herd. She is tremendously deep bodied with great feet and legs and a great udder. The grandam, in my herd is 16 years old, still looks good with a super udder and really milks and every calf is a good one. The sire is the great DC/CRJ Tank E108P bull that is one of the premiere bulls in the Charolais breed today. This young bull combines the best of Dakota and Tank both having all around great EPD's but are near 20 for calving ease.

**LOT 6 – VG MR ADAM 1516, Reg. M1012263, Born 6/5/25**

Sire – M6 BELLS & WHISTLES 258P

Dam – VG MISS ABIGAIL 1002

<u>CE</u>	<u>BW</u>	<u>WW</u>	<u>YW</u>	<u>MILK</u>	<u>REA</u>	<u>FAT</u>	<u>MARB</u>	<u>TSI</u>
11.6	-0.7	65	121	23	.73	-.017	.27	266.71

His dam is a LOF/VPI Abraham 48A daughter, a bull from Virginia Tech I used for several years and believe is one of the great Charolais sires. I really believe in this cow family as I am retaining a herd bull from a maternal sister to Abigail 1002. This bull is sired by the Bells and Whistles bull so combines the Abraham bull with Bells and Whistles, he is young but has a great future and ranks in the top 4% of the breed for FAT EPD.

**LOT 7 – VG MR TANK 1518, Reg. M1012287, Born 6/11/25**

Sire – AC HOODOO U866

Dam – VG MISS GENNY RIDGE 1201

<u>CE</u>	<u>BW</u>	<u>WW</u>	<u>YW</u>	<u>MILK</u>	<u>REA</u>	<u>FAT</u>	<u>MARB</u>	<u>TSI</u>
8.1	-.1	74	129	32	.81	.001	.04	269

If you want to impact your calves here is a bull that will add weaning and yearling pounds to his calves. His dam is one of my best young cows sired by DCR MR General Ridge G117 she is one of the deepest bodied young cows in my entire herd with a beautiful udder. The physical makeup of this young bull speaks for itself as he is a fancy young bull with a bright future.

**Lot 8 – VG MR DAKOTA 1519, Reg. M1012264, Born 7/9/25**

Sire – LT Dakota Rush 5500P

Dam – VG MISS BELL 715 TW

<u>CE</u>	<u>BW</u>	<u>WW</u>	<u>YW</u>	<u>MILK</u>	<u>REA</u>	<u>FAT</u>	<u>MARB</u>	<u>TSI</u>
15.3	-2.6	66	120	27	.64	.009	.16	265.47

This is the youngest bull in the sale and was weaned at just 3 months old. His mother is a big deep bodied Bells and Whistles cow with a great udder and disposition. I kept 5 Tank daughters from the 2024 calf crop and this bull's maternal sister is the best in my opinion.
